Thank you. This information is helpful. There are trucks delivering to that warehouse regularly and I am sure the next question will be center around what are the trucks delivering if the warehouse does not store any chemicals or material that is used in regular production. Can you help with this as well?

John,

I wanted to circle back with you and provide some more information about the Carus warehouse in question near [Ex. 6 Personal Privacy (PP)] home.

The security of property and assets is a top priority for any business, including Carus, and typically we do not share these details with members of the public. In the interest of transparency, I'm happy to provide some information. This property is used for storage, primarily old machine parts and scrap metal. To the best of my knowledge, the warehouse is nearly empty and there are no chemicals stored onsite at this location.

I hope this is helpful.

I have copied Cory Peruba, Director of Environmental Health Safety & Security. I know he has been in frequent contact with Paul and Rob, so I'm keeping him in the loop on this request.

Hi JoLynn. Brent is traveling this afternoon so I returned a call we received from Ex. 6 Personal Privacy (PP) today. Ex. 6 Personal Privacy (PP) resides at Ex. 6 Personal Privacy (PP) in La Salle and he wished to discuss a couple of things:

1. He would like to know what specifically is being stored at the warehouse location nearby his home. He wants to make sure steps are being taken to prevent any issues with what is being stored in that location.
2. He believes that area should be secured. He indicated there is a paddle lock gate in that location however according to Ex. 6 Personal Privacy (PP) the gate is continuously "dummy locked".

Can you discuss these concerns/questions with your team and get back to us?

Thanks for your help!

John S. Duncan
